PROFESSIONAL SUMMARY

Cybersecurity student with experience in Vulnerability Assessment (VAPT) and SOC operations. Skilled in using tools like Nmap and Wireshark, Docker, Splunk, Sentinel, Wazuh, Kali Linux, Burp Suit. Strong understanding of network security and OWASP Top 10, demonstrated through hands-on projects and CTF competitions.

EXPERIENCE

Apr 2025 – Present	Cyber Security Analyst	SkyLena InfoTech
Feb 2025 – Mar 2025	Cyber Security & Penetration Testing Internship	Hacktify Cybersecurity
Jun 2024 – Sep 2024	Cyber security Intern	Gateway Software Solutions

EDUCATION

M.Sc. CyberSecurity	Bharathiar University	2023 – 2025	GPA: 7.8
BCA	Government Arts College Salem-7	2020 – 2023	GPA: 7.9

SKILLS

- **Cybersecurity** : Vulnerability Assessment, SOC Operations, Web Application Pentesting
- **Tools** : Sentinel, Wazuh, Splunk, Azure, Nmap, Wireshark, Burp Suit, Metasploit, OWASP ZAP, Nikto, Docker.
- **OS** : Windows, Kali Linux, Parrot Security, Red Hat, Metasploitable 2.
- **Programming** : Python (Basic), Web Development
- **Soft Skills** : Problem-Solving, Critical Thinking, Team Collaboration.

CERTIFICATIONS

- **Foundation of Cyber Security** @ [Coursera](#)
- **Introduction to Cyber Security** @ [CISCO](#)
- **CEH – Certified Ethical Hacking & Python** @ [Livewire](#)
- **Typewriting** (English & Tamil) – Higher @ DOTE

PROJECTS

Secure IOT System

- Developed an IoT security framework comprising three key modules:
 - ✓ **Data Collection** – Simulated IoT device data using the Wokwi virtual IoT simulator.
 - ✓ **Custom Cryptographic Algorithm** – Developed a proprietary encryption algorithm in Python to secure IoT communications.
 - ✓ **Algorithm Comparison** – Benchmarked the custom algorithm against AES, DES, and ChaCha20, demonstrating lower computational energy usage while delivering enhanced data protection.
- **Technologies:** Python, MQTT, RSA, DSA, ChaCha20, Wokwi IoT Simulator.

Password Cracking Tool

- Developed a Python-based graphical user interface tool for password security analysis, comprising five modules: Brute Force Attack, Dictionary Attack, Wordlist Generator, Password Generator, and Password Analyzer. The tool enables users to test password strength, generate secure passwords, and simulate cracking techniques for educational and security assessment purposes.
- **Technologies:** Python, Tkinter, Cryptography.

Project Python Tutorial

- Developed a web-based platform for learning Python, covering topics from beginner to advanced levels. The site includes structured lessons, examples, and practice sections to help users understand core programming concepts.
- **Technologies :** HTML, CSS, JavaScript, SQL.

WORKSHOP AND CONFERENCE

- Presented a paper at a national-level conference on **Secure IoT System with Focus on Encryption Standards for Data Transmission**, Bharathiar University, Coimbatore, on March 2025.
- Attended a two-day workshop on '[Cyber Ninja: Ethical Hacking with Cyber Security](#)' at **IIT Madras**, organized by **Techobytes Technologies** on 11th & 12th January 2025.
- Attended a two-day workshop on "[Cyber Security with AI & ML](#)" at **SRM Institute of Science and Technology**, Chennai, organized by CSE Department on 22nd & 23rd February 2024.

ACHIEVEMENTS

- Participate in "[Meta CTF](#)" competition on 28th June 2024, applying advanced cybersecurity techniques to solve complex challenges.
- Ranked in the **top 20%** on [TryHackMe](#), demonstrating strong skills in cybersecurity and problem-solving through hands-on labs and challenges.
